The Honorable Joe Biden  
President of the United States  
The White House  
1600 Pennsylvania Ave NW  
Washington, DC  20500  

February 15, 2022  

Re: Medical Professionals for COVID Vaccine & Treatment Justice  

Dear President Biden:  

We are nurses, doctors, emergency medical technicians, medical students and others across a range of healthcare professions who have witnessed first-hand the devastating effects of COVID-19.  

As we continue doing all in our power to bring an end to this deadly pandemic, we ask that you please do the same by using the full power of the presidency to get vaccines, diagnostic tools and therapeutics to everyone who needs them around the globe.  

It pains us to note that still only a very small fraction of the populations of low-income countries have received any dose of a COVID vaccine. This scarcity is not only unjust and guarantees continued death and economic suffering abroad — it is also directly responsible for the rise of COVID variants that have undermined so much of our domestic progress against the coronavirus. Failure to address the global need for vaccines and treatments is prolonging the pandemic everywhere.  

That pharmaceutical monopolies are being allowed to prevent COVID vaccines, test kits and treatments from being produced in as many places as possible as quickly as possible is particularly dangerous and unconscionable. To enable an urgently-needed increase in global vaccine and treatment production, we ask that your administration please:  

• Actively cooperate with South Africa, India and other nations to secure a comprehensive and effective emergency waiver of global intellectual property rules so that countries can start producing COVID vaccines, test kits and treatments themselves without waiting around any longer for the permission of pharmaceutical monopolies;  
• Leverage the U.S. government’s massive investment in vaccine development, as well as all its existing legal authorities, to force vaccine firms to share their vaccine-making know-how with the many qualified and capable producers around the world; and  
• Launch and help fund a global manufacturing plan to support the development of vaccine production hubs around the world.
As you’ve said many times before, we are all in this together. To save millions of lives and restore any semblance of normalcy, the United States must help expand global vaccine, diagnostic and treatment production immediately. Pharmaceutical monopolies cannot be permitted to stand in the way of your goal of vaccinating at least 70% of humanity by the end of 2022.

We rely upon your leadership on this life-or-death matter.

Sincerely,

Barbara Holt Warren, MD, MPH (Tucson, AZ)
